

70:20:10 Forum

Organisational Licence

Improving the outcomes of workplace learning through a comprehensive solution that includes professional development, performance support resources and platforms.

Supporting skills and capability development

70:20:10 Forum helps shift the paradigm that the work of L&D is outdated and ineffective. It provides a sustainable support solution which embeds 70:20:10 across the organisation and makes learning a part of work. Practitioners use the elements of the support solution within the context of their organisation's objectives to improve the efficiency and effectiveness of experiential, social and structured learning, positioning L&D as a trusted business partner.

The 70:20:10 Forum is a community of practice for learning and performance professionals applying the 70:20:10 framework.

The 70:20:10 Forum's Organisational Licence solution provides human resources and learning & development teams with unlimited access to a growing repository of online practical tools, a 70:20:10 implementation platform, global 70:20:10 practitioner community, professional development resources and events.

An organisational licence enables an organisation to:

- ▶ Develop the capabilities of HR and learning professionals to cascade and implement 70:20:10
- ▶ Shift from training courses to performance solutions
- ▶ Improve the reach, flexibility and responsiveness of development solutions
- ▶ Measure and evaluate the impact of workplace learning solutions and drive high performance
- ▶ Provide just-in-time performance support to help team members to share and learn throughout their 70:20:10 implementation
- ▶ Access case studies and solutions with the growing global 70:20:10 Body of Knowledge™

"The 70:20:10 Forum helps our Capability team to learn as we work, with a set of tools and resources that help us to tackle business problems from a broader perspective rather than thinking that our job is limited to providing training. I've used the 70:20:10 Forum to reframe 70:20:10 in our organisation, transforming our strategy and approach."

Michelle Ockers,
National Technical Capability Manager, Supply Chain,
Coca-Cola Amatil

Annual Organisational Access is available to your L&D teams, HR practitioners and others offering them:

70:20:10 Implementation Pathway	An online platform which helps practitioners to effectively apply the 70:20:10 Forum's Toolkit resources and leverage global community support as they scope their work, identify defined tasks and associated activities as they plan develop and create strategies to improve and embed workplace learning solutions.
Global Practitioner Network	A global community of practitioners 'working out loud', sharing their work and learning about 70:20:10 as they implement the framework and contribute to the <i>70:20:10 Body of Knowledge</i> ™. The community is there to help you build your personal learning network through virtual practitioner support sessions (peer coaching & support); sharing case studies and online discussion forums.
Implementation Resources	The curated Toolkit library of proven, practical resources, guidance, information and customisable templates helps you implement 70:20:10 without having to start from scratch.
In Focus Webinars	Regular professional development webinars helping you and your team explore specific 70:20:10 concepts, considerations and approaches.
Toolkit Lab Webinars	Regular webinars that equip you to use and adapt the Toolkit implementation resources to suit your specific workplace requirements.
Community of Practice Webinars	These sessions offer a real-time engagement opportunity for practitioners to meet, connect and share their ideas around 70:20:10 implementation. Involvement in these sessions play an important role in enabling practitioners to remain agile and adaptive by gaining access to solutions sooner, thanks to the support and collective knowledge of their global peers.

Additional Services for Licenced Organisations (fees apply)

70:20:10 Practitioner Certification™	70:20:10 Practitioner Certification™ recognises your experience and achievement in implementing 70:20:10. It is a guided pathway comprising a series of practical activities which align, guide and support team participants to apply 70:20:10 principles and practices to their work. It is offered over three levels reflecting the roles and responsibilities within the learning function.
Global Services	Our in person and virtual enablement services are integrated with access to 70:20:10 Forum benefits to provide a sustainable solution.
